Introduction 4
Description of the Entities 5
Brief Description of the Database Process 5
Database Development 6
A. The TAG Entity 6
B. The USERS Entity 8
C. The RESOURCES Entity 11
D. The UserResourceTag Entity 14
Build & Apply Queries to the Database 17
a. List Specific Values of RESOURCES Entity 17
b. List Specific Values of USERS Entity Filtering 'usertype' Attribute 18
c. List Specific Values of RESOURCES Entity Comparing of a Date Value and Apply Ordering Formats on Results 19
d. List the Number of Users Satisfying a Certain Clause and Use Alias on Results 20
e. List Values Relevant to a Specific User, that are Stored on another Entity, Avoiding Duplication and Applying Ordering Format Results 21
f. List Values Crossing 3 different Entity Joins & Filtering Results Based on a Pattern 22
g. List the Aggregation of Records Stored For a Specific User 23
NORMALIZATION 24
Description 24
A. DEPENDENCIES DIAGRAM (1^{ST} NORMAL FORM) 25
B. CONVERTION RESULTS (2^{ND} NORMAL FORM) 25
C. CONVERTION RESULTS (3^{RD} NORMAL FORM) 26

Introduction

The aim of this report is to develop a collaborative tagged resource system and that is meant to be available on a College's e-learning platform. The resources will be shared among the students and the academic staff of a College (User authentication and authorization is performed by the e-learning platform and is beyond the scope of this system). The database of the system should keep track of Users, Resources and Tags. A ternary relationship between these 3 entities has been modeled using a bridge relation 'UserResourceTag'.
